

INDEX

TO VOL. LXIV (VOL. XXII, FOURTH SERIES), OF THE
AMERICAN JOURNAL OF PHARMACY.

Absinthiin, preparation and characters,	311
Acacia Farnesiana flowers used in perfumery,	171
Aceta, gradual decrease of acetic acid,	143
Acetanilide, purity of,	615
Acetyl- <i>p</i> -amidosalol. (See Salophen.)	
Acetylene, preparation from bromoform,	314
Acid, acetic, diluted, strength of absolute acid,	183
ampelochroic, coloring matter of the vine (Gautier),	626
anemonic, preparation and chemical formula,	373
benzoic, separation of salicylic acid (Schaap),	442
boric, characters of two varieties,	312
effect on bacteria (Jaenicke),	97
in vegetables,	137
toxic effects of,	192
boroboric, composition and use,	99
carbolic, crude, assay of,	566, 614
citric, commercial, presence of lead,	405
crystallization of,	410
daturic, properties of salts of,	366
gallic, behavior in the organism (Mörner),	438
conversion into benzoic acid,	79
hydrobromic, diluted, strength of and presence of other acids,	184
hydrocyanic, action on calomel,	311
Vortmann's test for,	543
isoanemonic, formation of,	372
lactic, use of, in croup,	607
molybdic, color reagent for aromatic oxycompounds,	439
nitric, action on metals (Montemartini),	618
diluted, percentage strength of,	184
percentage strength of,	184
nitrous, use as a disinfectant,	190
oleic, tests of purity,	374
phosphoric, volumetric determination,	572
salicylic, detection in salicyl-aldehyd and methyl salicylate,	22
glycerin a solvent for,	29
preparation without distillation,	462
reaction with exalgine,	571
separation from benzoic acid (Schaap),	442
succinic, formation during fermentation,	522
sulphurous, decomposition by charcoal,	466
result of assay,	183
test paper for,	463
tannic, behavior in the organism (Mörner),	438
tartaric, commercial, presence of lead,	405
synthesis of,	467
tetrathiodichlorosalicylic, preparation and antiseptic properties of,	610
thiolinic, preparation and characters,	309

Acid, thiophene-sulphonic, characters of,	315
thiosalicylic, preparation and use,	464
tumenol-sulphonic, preparation of,	81
Acids, normal, gravimetric standardization of,	374
Aconine, formation, properties and conversion into aconitine (Dunstan and Passmore),	209
Aconitine, formula and properties (Ehrenberg and Kurfürst),	637
reactions of,	415
Aconitum Napellus, alkaloids of (Dunstan and Umney),	207
Adulterations, discussion on,	216
Agathine, medicinal use and characters,	409
Agrostemma Githago, character and action of sapotoxin (Kroskal and Kobert),	320
Albany College of Pharmacy,	279
Albumin, test for in urine,	142
Albumone, isolation and properties,	230
Alcock, F. H. Assay of jalap,	533
Alcohol, amyl, production in the fermentation of starch by a bacterium (Perdrix),	152
Alcohols, detection in spirits of wine (Bardy),	627
Alkaloids, estimation in extracts,	25, 26
indicator for assaying,	521
volumetric determination of (Barthe),	638
Allantoine, physiological action of,	231
Alloxanthine, physiological action of,	231
Allyl sulphide, properties of,	612
Aloes, cause of difference of character and odor,	543
Aluminium paraphenolsulphonate, preparation and action,	524
Ambergris, characters of,	570
American Pharmaceutical Association,	330, 443
Ammonia, color reaction with syrup ferrous iodide,	408
water, percentage strength of,	184
Ammonium molybdate, use as a reagent,	572
Amyl nitrite, method of examination,	448
Amyloid, vegetable, preparation and characters (Winterstein),	483
Anagallis arvensis contains digestive ferment,	608
Analgene, formula and preparation,	310
Andromeda mariana, constituents of leaves,	458
Anemon-camphor, crystallization of,	372
Anemonin, isolation, characters, etc.,	372
Angustura bark, constituents of (Beckurts and Nehring),	410
bark, false, percentage of alkaloids (Smythe),	115
Anise, value as galactagogue,	604
Antifebrin derivatives, action of (Aronsen),	103
Antimonious chloride, solution in sodium chloride,	313
Antimony, use in whooping-cough,	517
Antinonin, properties and use,	521
Antipyrine, chlorine derivative of,	61b
in infantile diarrhoea,	139
method of dispensing with euphorin,	142
test for,	142
use for checking secretion of milk,	79
benzoate, preparation of,	141
picrate, preparation of,	141
Antisepsis, dental, mouthwash for,	406
during epidemics,	467
Antiseptic mixture, Cavazzini's,	607
Apoatropine, preparation and character,	644
Arima, mineral water, constituents of,	518
Aristol, use in cancer,	119

Aristolochin, principle of seeds of <i>Aristolochia</i> species,	82
Aronson, H. Action of antifebrin and phenacitin derivatives,	103
Arrowroot plantations of Queensland,	631
production in Bermuda,	171
Arsenic, powdered, spontaneous combustion,	613
cyanide, preparations and properties of,	606
Asafoetida, percentage of alcohol-soluble matter,	385
Asaprol, see Calcium β -naphtholsulphonate,	517
Asepsis and antiseptis, preparation of dressing,	386
Ashinoyou, mineral water, constituents of,	518
Atami, mineral water, constituents of,	518
Atropamine, preparation and properties,	642
Atropine, hæmostatic effects of,	230, 552
preparation and characters of salts,	587
use in hyperacidity of the stomach,	515
Atropinum naturale, characters of,	589
Bacillus amylozymicus , ferments starch with production of amyl alcohol (Perdrix),	152
Ballantyne, H. and R. T. Thomson. Revision of constants for fats and oils,	377
Balmony, constituents of overground portion,	65
Balsam, tooth, formula for,	463
Bardy, C. Detection of higher alcohols in spirits of wine,	627
Barium, test for absence from strontium salts,	313
chloride, in scrofula,	232
medicinal use and effect,	606
poisoning by,	137
salts, toxicity of,	192
Barthe, L. Volumetric determination of the alkaloids,	638
Baur, A. Artificial musk,	31
Bebeerine, reactions of,	414.
Beck, A. L. Preservation of syrup of iodide of iron,	18
Beckurts, H. and P. Nehring. Angustura bark,	410
Bedloe, Edw. Camphor, growth and manufacture in Formosa,	37
Beeswax, process of analysis (Mangold),	532
test for purity of,	23
Belladonnine, character and composition,	643
Benzonaphthol, an intestinal antiseptic,	77, 517
Benzoyloscine, character and reactions,	595
Benzoylpseudotropine, alkaloid of Java coca-leaves (Liebermann),	44
characters of, and salts,	579
Berberis aquifolium and B. vulgaris, alkaloids of (Rüdel),	379
Beringer, G. M. Formulas for several pharmaceutical preparations,	4
Oleoresins,	145
Some commercial vanillas,	289
Value of Ehrlich's urine test for typhoid fever,	559
Berkenheim, A. Menthol,	491
Biernacki, E. Influence of temperature on digestive ferments,	87
Bismuth benzoate, preparation of,	517
salicylate, method of preparation,	76
Blackader, Dr. Infants' food,	151
Blood, coagulation of (Pekelharing),	201
Boraginæ, active principle of,	140
Borax, action of, on chloral,	76
reaction with sodium bicarbonate in glycerin,	451
Borneol acetate, in oils of Abies,	613
Boron, amorphous, properties of,	616
Bougies, lactic acid, preparation and use,	308
British Pharmaceutical Conference,	535

Bromine, separation from chlorine and iodine (Schierholz),	574
Brooke, E. and F. A. Ringer. True and commercial pareira,	255
Brooklyn College of Pharmacy,	279
Brown, D. Impurity in chloroform,	238
Brucine and strychnine, separation of,	449
Brush, aseptic, use of Egyptian <i>luffa</i> ,	40
Bryonia dioica, constituents of leaves,	470
Butter acids, separation and character of (Koefoed),	582
pure and adulterated, microscopical examination (Ferdinand),	636
Butylethylbenzene, derivatives, artificial musk,	33
Butylmetaxylene, derivatives, artificial musk,	33
Butyltoluene derivatives, artificial musk,	31
Cacao seed, constituents of,	568
Cadmium, action of nitric acid on,	618
Caffeine, estimation of, in coffee,	194
estimation of, in tea,	468
physiological effect of,	231
Calcium bisulphite, properties of,	467
hypophosphite, results of assay,	450
β -naphtholsulphonate, characters of,	517
salicylate, method of preparation,	23
salts for therapeutic use,	365
tartromalate, isolation from grape juice and wine,	365
Calx sulphurata, results of examination (Kaercher),	618
Camilla, Stefana. Italian yellow waxes,	196
Camphor, compounds with aldehydes, process for,	30
for hypodermic injection,	465
growth and manufacture in Formosa (Bedloe),	36
Canna edulis, cultivation in Queensland,	631
Cantharidin, process of preparation,	461, 608
Capsicum annuum, constituents of,	370
Carrara, G. Bark of Gonolobus Condurango,	92
Condurangin,	640
Carvacrol, preparation of,	228, 604
Cassia holosericea, source of Aden senna,	386
Castoreum, inferior, percentage of ash, etc.,	233
Cement, diamond, preparation of,	409
porcelain, preparation of,	409
tooth, formula for,	463
universal, preparation of,	409
Ceratantthera Beaumetzi, African tæniifuge,	
Cerate, cantharidal, process of preparation,	462
Charcoal, animal, B. P. requirements,	541
Chemical symbols,	448
Chicago College of Pharmacy,	279
Chimaphila umbellata and C. maculata, comparative analysis (Peacock),	295
Chittenden, R. H. and T. B. Osborne. Proteids of maize,	428
Chloral, action of borax on,	76
Chlorine, separation from bromine and iodine (Schierholz),	574
Chloroform, decomposition on exposure,	391, 647
impurities of,	144, 238
Pictet, action of sunlight,	25
quality of commercial,	543
solubility of iodine in (Duncan),	100
tests for purity,	308
Cholesterin, preparation from phanerogamous plants,	606
Chrysanthemum flowers, alkaloid from (Zuco),	163
Cinchona barks, cultivated at Reunion, value of,	193
estimation of quinine (Schmidt),	608

Cinchonamine, physiological action of,	607
Cincinnati College of Pharmacy,	388
<i>Claassen, Edo.</i> The flora of Northern Ohio,	166, 211
<i>Clague, T. M.</i> Artificial human milk,	203
Cobalt, action of nitric acid on,	618
Coca, from different localities, quality,	248
leaves, Java, alkaloid of (<i>Liebermann</i>),	44
Cocaine, action upon blood constituents,	230
anaesthetic properties, latent and intensified,	229, 368
milk of, preparation,	368
reactions of (<i>Stead</i>),	317
test for,	462
cantharidate, preparation and uses of,	610
Codeine, reactions of,	414
sulphate, insoluble residue in the solution (<i>England</i>),	120
Coffee, assay of,	194
cultivation of, in Jamaica (<i>Lloyd</i>),	396
<i>Coleman, J. B.</i> Rapid method of solution in the cold,	375
Collodion, decomposition of iodoform in,	194
Condurangin, character of (<i>Carrara</i>),	640
Conduransterin, constituent of <i>Gonolobus Condurango</i> bark,	93
Copaiba, African, so-called, comparison with South American (<i>Umney</i>),	33
from different localities, quality,	248
Copper, atomic weight of,	368
presence in galenical preparations (<i>Haussmann</i>),	7
salts, new reagents for,	77
Cordial, neutralizing, formula for,	4
Corn cockle, character of sapotoxin,	320
Crayons, iodoform, elastic, formula for,	316
Creasote, use in tuberculosis,	112
valuation of,	195
<i>Crookes, W.</i> Flame of burning nitrogen,	441
Croup, treatment of,	607
Crystals, artificial coloring of (<i>Lehmann</i>),	321
Cubebs, from different localities, quality,	248
spurious, source, character, etc. (<i>Holmes</i>),	494
Cumin, value as galactagogue,	604
<i>Curry, G. L.</i> <i>Gillenia stipulacea</i> ,	513
Cynoglossine, alkaloid from <i>boragineæ</i> ,	140
Dammar, detection of resin in,	613
<i>Datura alba</i> , constituents and use in Japan,	523
<i>Davies, D. H.</i> Koumiss,	629
<i>De la Cour, J. C.</i> Estimation of eugenol in oil of cloves,	508
Dermal prescriptions, formulas for various,	189
Dermatol, use of, in otorrhœa,	607
Diaphtherin, characters and reaction with iron,	374
(See also <i>Oxychinaseptol</i> .)	
Digestion, chemistry of (<i>Hayens and Winter</i>),	241
Digitalein, properties of,	134
Digitalin, characters and detection of impurities (<i>Kiliani</i>),	41
solubilities of commercial,	315
<i>Digitalis purpurea</i> , dose of,	367, 468
hypodermic injections of,	608
constituents of,	415
Digitogenin, preparation of,	425
Di-iodo-thiophene, substitute for iodoform,	190
Disinfectol, characters of,	135
Diuretin, use in infantile practice,	228
<i>Dowd, Andrew W.</i> <i>Andromeda Mariana</i> ,	458

Dressing, sublimate, acid, preparation,	451
Drops, toothache, formulas for,	463
Druggists prosecutions against,	281
Drugs, preservation of,	80
Dulcine or phenetol carbamide,	611
<i>Duncan, W.</i> Solubility of iodine in chloroform,	100
<i>and T. S. Tweedie.</i> Commercial goa powders,	93
<i>Dunstan, Prof. and F. W. Passmore.</i> Formation of aconine and conversion into aconitine,	209
<i>and J. C. Umney.</i> Alkaloids of true Aconitum Napellus,	207
<i>Dvorkovitch, P.</i> Examination of Chinese tea,	48
<i>Dymond, T. S.</i> A mydriatic alkaloid in lettuce,	46
<i>Ehvenberg, A. and C. Kurfürst.</i> Aconitine,	637
Elixir, compound, of iodine, preparation and use,	261
yerba santa, administration for disguising taste of quinine (Strouse),	6
Emulsion, cod-liver oil, method of preparation,	133
salol, process of preparation,	519
<i>England, Jos. W.</i> Infusion of digitalis,	361
Iodine, new method of giving it,	20
Note on codeine sulphate,	120
Oxygen and its medicinal application,	11
Percentages in solutions,	72
Ephedra monostachya, alkaloid present in,	234
vulgaris, alkaloids present in,	234
use in rheumatism,	193
Epidermin, a surgical dressing,	368
Ergosterin, from cryptogamous plants,	607
Erythrocentaurin, from Erythraea Centaurium,	311
Erythroplœine, toxicity of,	194
Essence, lavender, ammoniated, formula for,	518
lemon, manufacture of,	545
Ether, use as a menstruum (Sawyer),	624
Ethyl bromide, cause of impurities,	143
Eucalyptol, characters of pure,	541
Eugenol, estimation in oil of cloves (De la Cour),	508
acetamide, a new anæsthetic,	465
Eupatorin, principle of Eupatorium perfoliatum (Shamel),	511
Eupatorium perfoliatum, constituents of root (Kaercher),	510
rotundifolium, constituents (Shaw),	225
Euphorbia antiquorum, effect of milk juice,	468
pilulifera, medicinal use,	584
Euphorine, method of dispensing with antipyrine,	142
Exalgine, reaction with salicylic acid,	571
Exodyne, an antipyretic mixture,	139
Extract, beef, process of manufacture (Shinn),	561
belladonna, alkaloids in,	26, 141
Goulard's, substitute for,	371
glycyrrhiza, purification of,	615
nux vomica, estimation of alkaloids,	25
thyroid, preparation and medicinal use (White),	634
vanilla, character of commercial (Hausmann),	71
fluid, cinchona, proper menstruum (Remington),	458
erythroxyton, proper menstruum (Remington),	458
glycyrrhiza, method of preparation,	133
nux vomica, assay method (Lloyd),	337
Turkey corn, suitable menstruum for,	133
Extracts, containing chlorophyll, estimation of alkaloids,	26
dry, containing glycyrrhiza, estimation of alkaloids,	26

Fats, iodine absorption of,	407
revision of constants employed in analysis of (Thomson and Ballantyne),	377
use of acetic acid for testing,	516
Fennel as a galactagogue,	604
<i>Ferdinand, J.</i> Microscopical examination of butter,	636
Ferments, digestive, influence of temperature (Biernacki),	87
Ferrous iodide, action upon starch and filtering paper,	235
Ferrum reductum, use of purified hydrogen in the preparation of,	461
Fischer, Emil, of Berlin University,	500
Flora of northern Ohio (Claassen),	166, 211
Flowers, artificial coloration of,	470
Flückiger, Memorial,	172, 500
Food, infants' (Blackader),	151
Formic aldehyde, antiseptic properties of,	604
Fruit juices, preparation of,	386
preservation of,	231
Fumarine, present in a papaveraceous plant,	404
Galactagogue remedies, various,	604
Galega officinalis as a galactagogue,	604
Gas tester, Shaw, construction of,	595
Gases and liquids, general law applicable to (Wanklyn),	236
Gases, compressed, medicinal use of,	601, 645
Gastric juice, chemistry of (Hayens and Winter),	241
<i>Gautier, A.</i> Coloring matters of the vine,	626
Gauze, iodoform, adulteration of,	404
assay of,	567
Gillenia stipulacea, results of analysis (Curry),	513
trifoliata, constituents of,	121
Glass, action of water on (Mylius and Forrester),	472
Glechoma hederacea, properties, use and constituents,	66
Glue, marine, preparation of,	407
Glycerin, as a wound dressing,	29
salol, formula and use,	521
Gold chloride and sodium, medicinal use and dose,	466
Gonolobus Condurango bark, constituents, etc. (Carrara),	92, 640
Grindelia robusta, constituents of,	370
<i>Grittner, A.</i> Detection of resin oil in fatty and mineral oils,	376
Guaiacol biniodide, a new aristol,	195
Guaiacol carbonate, preparation and character,	82
Gum arabic, artificial, preparation of,	516
source of commercial,	329
arabol, composition of,	309
Gymnocladus canadensis, description and constituents (Martin),	557
Hæmogallol, preparation and administration,	82
Hæmol, preparation and administration,	82
